Skills

| React | Tailwind | Webpack |

| HTML | CSS3 |

| JavaScript (ES6) |

| Git version control |

Projects

Portfolio website, https://gretara.github.io/portfolio2023/ ⊡
A responsive portfolio website featuring a list of technologies I work with, showcasing my skills, and projects. The website includes my resume and serves as a visual representation of my proficiency in front-end development and UI/UX design. Built with React and styled with Tailwind.

Fashionhub online shop, https://fashion-hub-project.vercel.app/ ⊡
This project is a simple yet functional online store developed with React.js and styled using Tailwind CSS. It sources product data from the fakeStoreApi, providing a clean and efficient shopping experience.

Fylo landing page, https://gretara.github.io/fylo/ ⊡
The end product of a front-end challenge that entailed reproducing a specific design for a fictional company's landing page. Built using React and styled with Tailwind.

Weather App, https://gretara.github.io/weather-app/ ⊡
Web app for visualizing the current weather of a city. It fetches weather data from OpenWeatherMap API and can show current weather based on the user's input or location. Utilizes API integration and Webpack module bundling.

Education

BSc Biology, Radboud University
Through my studies, I developed a strong foundation in problem-solving, analytical thinking, and attention to detail. These skills have proven to be valuable assets as I taught myself the foundations of web development.
